

RAJNISH KUMAR SHARMA

GenAI Developer | Python Developer

Bengaluru, India | +91-8114530825
rajnishkumar81145@gmail.com | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

Summary

GenAI-focused Python developer with experience building AI-powered systems using LLMs, RAG pipelines, and multi-agent frameworks. Skilled in designing scalable backend APIs, semantic search using embeddings, and delivering solutions that improve accuracy and efficiency. Strong problem-solving skills and a quick learner of new AI technologies.

Projects

AI-Powered Customer Support Intelligence Bot [GitHub Repo](#)

April 2026

CrewAI, FastAPI, GPT-4, Gemini, LlamaIndex, MongoDB, BigQuery, Redis

- Developed a multi-agent AI system to analyze 1,000+ sales call transcripts and enable Slack-based Q&A.
- Built a RAG pipeline with LlamaIndex and embeddings, cutting query response time by 50%.
- Enhanced FastAPI endpoints and Redis-backed background processing for efficient real-time query handling.
- Designed scalable data ingestion and retrieval workflows to improve system performance and reliability.

Resume Matcher (RAG-Based ATS Assistant) [GitHub Repo](#)

March 2026

Python, FastAPI, Groq LLM, ChromaDB, SentenceTransformers, RAG

- Created an AI-based ATS tool to parse 1,000+ resumes and job descriptions.
- Produced ATS match scores and reduced screening time by 70% through semantic search.
- Built a vector embedding pipeline using ChromaDB and SentenceTransformers for similarity matching.
- Leveraged Groq LLM to generate concise skill-gap feedback for faster candidate evaluation.

RAG AI Assistant [GitHub Repo](#)

Feb 2026

Python, LangChain, Hugging Face Transformers, RAG, ChromaDB

- Built a chatbot to answer questions from PDF documents using retrieval-based generation.
- Applied document chunking and embeddings to improve context retrieval, enabling accurate answers for long-form PDFs.
- Designed an end-to-end LLM pipeline in LangChain for ingesting documents and handling user queries effectively.

Experience

Scifyx Tech Private Limited

Remote, India

Backend Django Intern

Aug 2025 – Nov 2025

- Developed and maintained backend services using Python and Django REST Framework.
- Gained practical experience in API development, database management, and project execution.

Besant Technologies

Bengaluru

Python Full Stack Developer Intern

Jan 2025 – Jul 2025

- Built full-stack web applications with Python, Django, React, and SQL.
- Created responsive UI components with HTML5, CSS3, Bootstrap 5, and JavaScript.

Technical Skills

Programming: Python, SQL, JavaScript

GenAI: Large Language Models (LLMs), LLM Orchestration, Prompt Engineering, Retrieval-Augmented Generation (RAG), LangChain, Hugging Face, Transformers, Embeddings, Fine-Tuning, PEFT, AI Agents (CrewAI, AutoGen), Model Context Protocol (MCP) and Agent-to-Agent (A2A) Communication

Basic ML: Classification, Regression, NLP, Deep Learning, Computer Vision

Backend & Libraries: FastAPI, Django, REST APIs, NumPy, Pandas, SciPy, Matplotlib, TensorFlow, PyTorch

Data & Tools: ChromaDB, FAISS, MongoDB, BigQuery, Redis, Git, GitHub, AWS (EC2, S3), Postman, VS Code, Jupyter Notebook

Soft Skills: Effective communication, Problem-solving, Time management, Creativity, Teamwork, Collaboration

Education

Mother Institute of Technology, Bihta, Patna

2023

B.Tech in Computer Science and Engineering

CGPA: 8.29/10

Mahamda Inter College, Siwan

2019

BSEB, Patna, Bihar

61%

Certifications

- Python Full Stack Development – Besant Technologies
- Programming Essentials in Python – Cisco Networking Academy
